Imported Bulbs of

Superior Quality

Have always given satisfactory results for
Winter Forcing and Outdoor Planting

Bulbs of Quality In placing our contracts for Bulbs with our special growers in the many foreign countries, we specifically stipulate that they shall be filled with the best quality and size that each country produces. The quality of the bulbs that we have always received from these foreign countries will certainly recommend them. Under the conditions of a poor growing or ripening season, the bulbs which we receive will not be underrated with any which come to the United States.

Bulbs will produce a repetition of blooms from Thanksgiving until Easter. Early planting of Allium Neapolitanum, Roman Hyacinths, Narcissus Paper White, Jonquil Campernelle and Tulips Duc van Thol may be flowered from November to January.

For Midwinter blooms use Dutch Hyacinths, Tulips, Narcissus, Crocus, Freesia; these may also be kept in a cold situation for late flowering.

Late blooming sorts, as Narcissus Poeticus and Alba plena odorata, Ixia, English and Spanish Iris, Anemone and Ranunculus do not flower until early Spring.

Bulb shipments are made as early as possible after orders are received. Bulbs are not received by us at one time, which necessitates our making extra shipments. Customers desiring bulbs made in one shipment will please state same when ordering.

We do not pay postage on bulbs, except where specified at heading of such variety. Bulbs ordered to be sent Parcel Post should be accompanied by additional amount at zone rates, weight being given at heading of each variety.

Naturalizing In the events of the present times and the increasing improvement of city and country estates the thought of naturalizing is always in vogue. This can in no way be better effected than by the continual addition of Spring-flowering bulbs. Nothing recommends itself so strongly during March and April in the lawns and fields, among the woods and along brooks, as these Spring-flowering bulbs.

Herbaceous Plants A very favorable time for setting out herbaceous plants is during September and October. These plants are in excellent condition at this season of the year and we would suggest to those intending such perennial planting to consider doing so at above-mentioned time.

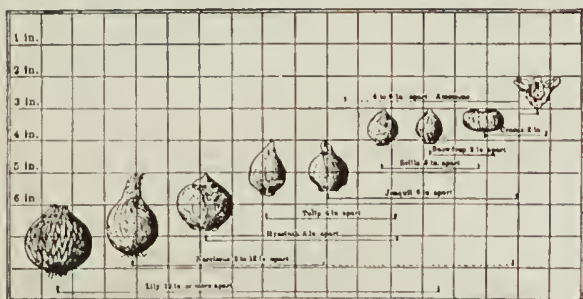

Our stocks of Hardy Perennials are in excellent condition, large, strong plants and of sufficient texture to withstand the Winter season.

Deliveries Our bulbs are all well packed to withstand general transportation and every precaution taken for their safe delivery to the purchaser. In case of accident by broken packages, bulbs being lost or jammed and bruised, either sign for them "damaged," or refuse to accept such and have transportation company return them to us, notifying us instantly of same. We do not pay freight or express charges. We guarantee safe delivery to the Railroad and Express Companies.

Suggestions In sending in orders selected from the catalogue, we appreciate the use of the enclosed order sheet, and in case the enclosed is insufficient, we will send extra sheets upon request. It is always advisable to keep a copy of your order and should a mistake occur the same may be readily traced.

Pæonies, Fertilizers, Insecticides and Sundries at prices quoted are delivered to Freight Terminals, Express Companies and Post Office, purchaser paying transportation.

How and When to Plant Bulbs for Fall planting may be set out during September, October and November, or until the ground is frozen.

In the accompanying diagram are given the approximate depth and distance apart that the bulbs should be planted.

Trees and Shrubs A very prominent feature in the growing of Trees, Shrubs and Small Fruits, is having them planted during the Autumn. The best time for planting Evergreens is September, that being the month when they are dormant, and satisfactory results obtained. Most of the varieties of Deciduous Trees may be moved or transplanted during October and November, after a hard frost and when the foliage has nearly all fallen. Fruit trees and hard-wooded Small Fruits may be treated in the same manner as the deciduous trees, excepting the Peach, which should only be transplanted in the Spring months.

HYACINTHS

The Hyacinth is one of the most popular of the Fall bulbs and commands a place in every home and garden. There is nothing more attractive than a well-grown pan of Hyacinths, with their brilliant colors and delightful fragrance, together with their long keeping qualities and decorative appearance. Hyacinths may be brought to bloom about the latter part of January and if taken into the house at intervals, flowers may be obtained until the middle or latter part of April.

Hyacinth Mother Bulb, La Grandesse—See page 3

Outdoor Culture

Prepare the beds or borders where they are to be planted with well-rotted manure, having it well dug over to a depth of at least 12 inches, being well assured that the soil is well drained to avoid any decay of the bulbs. Plant the bulbs at least 5 inches deep and 6 apart. As soon as the ground begins to freeze cover the beds with a litter of leaves, straw or pine boughs to a thickness of 6 or 8 inches. This covering should be removed as early as possible after all danger from severe cold weather is past.

Culture in Pots

When potting Hyacinths for growing indoors a medium light, well-enriched soil is best suited, placing some broken crock in the bottom for drainage. Set the bulbs about $\frac{1}{2}$ inch below surface of soil, giving them a thorough watering, and put them away in a dark, cold place, so that they will not freeze; water them as often as need be to avoid drying. They should be allowed to remain for at least 12 weeks, or until the pot is well filled with roots, when they may be removed to a warmer location, but still kept dark until a growth of 4 to 5 inches is made, then bring to the light gradually until allowed to flower.

When a repetition of bloom is required, bring out one or more pots every week or ten days from place where allowed to root.

Culture in Glasses

To grow Hyacinths in glasses of water the type illustrated should be used. The largest size bulbs should be selected, as they produce better results, are more rigid in the glasses and will support the top-heavy bloom. When the bulb is placed in the top of the glass, fill up with water so that the bottom of the bulb is about $\frac{1}{4}$ inch below level of water. Change the water every three or four days. A little broken charcoal put in the water will help to keep it fresh and sweet. The same general directions apply for growing in water as noted in "Culture in Pots." We recommend the Exhibition size bulbs for growing in glasses.

Six bulbs of a kind at the dozen rate,
25 bulbs at the 100 rate, 250 bulbs at
the 1000 rate.

Hyacinths for Bedding

SINGLE AND DOUBLE

None of the many Spring-flowering bulbs can produce the uniform and symmetrical effects of the Hyacinth. Its distinct and bright colors, sturdy and erect habit, and the beautiful contrasts produced when planted in solid beds or used as a border for other tall-growing bulbs, give it a deservedly front place among flowering bulbs.

Our special bedding Hyacinths are all sound bulbs, sure to bloom and develop large, compact spikes. They are fine for bordering perennial beds and shrubbery. This size will give excellent results.

By Parcel Post add postage at Zone rates, (see page 1). Weight 2 lbs. per doz., 15 lbs. per 100.

Dark Red	Pure White	Dark Blue and Purple
Rose and Pink	Blush and Tinted White	Yellow
	Light Blue and Lavender	Mixture of Colors

Each 6c., doz. 50c., 100 \$3.50, 1000 \$32.00.

Hyacinths

Miniature, or Dutch Roman

By Parcel Post add postage at Zone rates, (see page 1). Weight 2 lbs. per doz., 15 lbs. per 100.

The bulbs of this Hyacinth are of a small size but of the true Dutch type, and not allied to the Roman Hyacinth as the name may imply. These bulbs are suitable for growing in large quantities where close masses of flowers are wanted, such as may be required in a perennial bed and border; or they may be used in clumps among shrubbery and also for edging.

The individual colors of the following varieties may be obtained from our list of Exhibition Hyacinths on pages 3 and 4.

RED AND ROSE	BLUE AND PURPLE	WHITE
Gigantea	Grand Lilas	Baroness Van Thuyll
Gertrude	Czar Peter	La Grandesse
Norma	Queen of the Blues	L'Innocence
Moreno	Grand Maitre	Grandeur a Merveille
General Pelissier	La Peyrouse	
Robert Steiger	King of the Blues	
	Lord Derby	

Mixture of All Colors.

Each 5c., doz. 40c., 100 \$2.50, 1000 \$22.00.

Hyacinth growing in water

Hyacinths Early Roman

These early-flowering Hyacinths are particularly valuable for the florists in their Fall and Winter cut-flower work, and are equally important for the amateurs that they may obtain flowers through Thanksgiving and Christmas until the Dutch Hyacinths commence to bloom. To obtain the above results plant early in September and force gently. Six bulbs planted in a 6-inch pot or bulb pan make a very fine effect.

By Parcel Post add postage at Zone rates, (see page 1). Weight 2 lbs. per doz., 10 lbs. per 100.

SINGLE EARLY TULIPS

At the time of year when a flower of any sort attracts attention, the Tulips probably have no equal. The effects which they produce with their varied and brilliant colorings cannot be obtained in any other flower during the early Spring. Tulips make a most gorgeous display in flower beds before the time for planting the regular Summer flowers, and also produce a beautiful effect among shrubbery and perennial beds if planted in groups or clumps or used as borders. For forcing in the house in Winter, Tulips will make as nice pot plants as any one may desire. The same general directions for cultivation in pots may be used as for Hyacinths (see page 2).

The Single Early Tulips are the best for bedding, as they flower much earlier than the other sorts and will be through blooming in time for the preparation of beds for Summer flowers. Tulip bulbs should be set four inches apart, and covered at least four inches deep. Close planting produces the best bedding effects.

By Parcel Post add postage at Zone rates (see page 1). Weight 1 lb. per doz., 8 lbs. per 100.

Fottler, Fiske, Rawson Co.'s Prize Mixture Single Early Tulips

Our F. F. R. Prize Mixture is the best assortment we have been able to select during our long experience. It contains all of the most desired, brilliant, striking and fancy colors, together with those of peculiar shading and markings.

This mixture comprises our best named varieties, as well as a great many sorts which we do not list. They are so assembled that they all attain approximately the same height and also flower within a few days of each other. The first size bulbs are the only ones used in this mixture; no inferior grade used. The satisfaction which this assortment has given to so many of our customers thoroughly recommends it to all who have not tried them.

Doz. 35c., 100 \$2.50, 1000
\$20.00.

Choice Selected Mixture

This Choice Selected Mixture is a combination of well-known and standard varieties which have always proved satisfactory, but does not include the new and high-priced sorts. These bulbs are all first size, blooming as near together as possible.

We can also supply the separate colors used in this mixture; such as crimson, dark red, scarlet, pink, rose, yellow and white.

New Rembrandt Tulips (Late Blooming)

The Rembrandt Tulip is one of the fanciest and most striking of the new Tulips, belonging as it does to the Late-flowering class and is a Darwin of the variegated and feathered type, having broken away from the regular self colors of the Darwin. A class of Tulips with beautifully colored flowers, usually delicate shades with flames or stripes of a darker shade. The blending of the colors is quite remarkable, while the contrasting colors produce the finest and prettiest effects. Their tall, sturdy stems supporting the large and perfectly formed blooms make this one of the finest of our Spring-flowering bulbs.

Rembrandt Tulip, Fleur de Marie

Breeder Tulips

These are the old Dutch self-colored Tulips, which have not been used for a number of seasons. The continuous demand for bronze and purple shades has revived a number of these odd and peculiar varieties.

The flowers, quite large and of a strong and vigorous growth, are usually grown in open ground, and are not suitable for forcing. The peculiar combinations of purple and bronze, yellow and bronze, brown and terra cotta, blue and maroon, etc., will certainly attract attention.

- Cardinal Manning.** (Kingscourt.) A curious blend of mauve and rose, which changes to an almost pure orange at the extreme edges of the petals. Doz. 40c., 100 \$3.00.
- Goliath.** Violet rose, edged amber; a very large flower. Doz. 50c., 100 \$4.00.
- Jaune d'Oeuf.** (Sunrise.) Golden, outside of petals shaded apricot. Doz. 50c., 100 \$4.00.
- Medea.** Crushed strawberry, shaded heliotrope, yellow center; an enormous flower. Doz. 40c., 100 \$3.00.
- Noir Veritable.** (Black Chief.) A fine large flower on long stem; color, dark purple black. Doz. 50c., 100 \$4.00.
- Ruby.** Deep maroon red, shaded orange; a tall and vigorous grower. Doz. 60c., 100 \$4.50.
- Collection of Six Varieties:** 6 bulbs of each, separately marked. \$1.25.

GIANT DARWIN TULIPS

The late-flowering Darwin Tulip has outclassed all its predecessors in type, style and beauty, and is at the present time the Queen of the Tulip family. It attains a height of two to three feet, with strong, heavy foliage, erect and robust stem, terminating in large and massive flowers. The colors of the Darwin embrace all the shades of white, pink, lilac, rose, scarlet, crimson and maroon, and most of the flowers show a particular satiny effect. Darwin Tulips are the finest among shrubby and perennials; they grow tall, bloom for a long time and, if planted six to eight inches deep and left undisturbed, will flower for many seasons. A great many of the varieties will force to good advantage and may be had in bloom during March.

Single Late, or May-Flowering Tulips

These lovely late-flowering Tulips are very effective for all kinds of decorative work, and their value as cut flowers cannot be overestimated. They are all perfectly hardy, raised in the most northern part of Great Britain and Ireland, and are eminently fitted for border cultivation for bedding, forcing and every purpose to which the early-flowering Tulip is put. They often grow from two to three feet high, and flower usually about Memorial Day, lasting fully two weeks in bloom. We have given this group considerable attention in recent years, and we can fully recommend the varieties listed below as the best of their kind.

Narcissus, Daffodils and Jonquils

There is at the present time a very large assortment of Narcissi from which to make selections, and nearly all are of a quality worthy of cultivation. It is almost impossible to list the complete line of these beautiful Spring flowers, but in the following few pages we offer the varieties which we deem to give the best satisfaction.

The Poetaz and Polyanthus types, the French-grown Trumpet Major and Jonquil Campernelle, may be flowered for Christmas, while the Large and Medium Trumpets and the Double-flowering sorts may be had in bloom from the middle of January until early Spring.

When ordering the large-flowered or double varieties, please do not use the word "Jonquil," as the true Jonquil is the small or miniature-flowered sort.

Culture Outside. The large-flowered, or the sorts which have large bulbs, should be planted from 4 to 6 inches deep and about 5 inches apart. Planting should be begun as soon as possible after October 1st, but bulbs may be planted any time before the ground is frozen too hard to work.

Culture in Pots. As a general rule, treat Narcissus the same as Hyacinths. They should be planted about 6 bulbs in a 6-inch pot or pan and put in a dark and cool place, where they may develop their roots. Let them remain until January 1st, when they may be removed to a warmer temperature, but keep in the dark until the foliage is about 6 inches high; then bring to the light and allow them to flower.

Double Narcissus. Sulphur Phoenix

Poetaz Narcissus, Elvira

Narcissus Poetaz Hybrids

These new Hybrid Narcissi are perfectly hardy and will force equally as well as the Polyanthus or Poeticus Ornatus from which they originated. The individual flowers retain the size and form of the Poeticus Ornatus as well as its fragrance and do not have the strong odor of the Polyanthus, resembling it only in quantity of blooms. While it is one of the best sorts for forcing in pots, it is admirably adapted for growing among pebbles in water, much the same as Narcissus Paper White. The producers of these beautiful Hybrid Narcissi, thoroughly recommend them.

By Parcel Post add postage at Zone rates, (see page 1). Weight 2 lbs. per doz., 16 lbs. per 100.

BUNCH NARCISSUS

For Christmas Blooming
Either in Soil or Stones and Water

By Parcel Post add postage at Zone rates, (see page 1). Weight 2 lbs. per doz., 17 lbs. per 100

If grown in pots, eight weeks will produce the flowers. We especially recommend to grow this bulb in pebbles and water, after the fashion of Chinese Sacred Lilies, as they are far superior to the latter. Flowers appear in three weeks in greater numbers and more perfected. Twelve bulbs should be planted in an ordinary-sized dish. It is advisable to start the bulbs in a dark place for four to six days. Grow cool and give plenty of water. In order to grow successions of bloom during the entire Winter, we have provided to supply these bulbs until March 1.

Extra Large Bulbs. Doz. 30c., 100 \$1.75, 1000 \$14.00.
Mammoth Bulbs. Doz. 40c., 100 \$2.50, 1000 \$18.00.

Paper White Narcissi, growing in water and pebbles

In our New England climate this class is not hardy and can be used for house culture only. Their easy culture should endear them to every flower lover. In Southern States these bulbs are perfectly hardy.

Colchicum, Autumnale Major

Blooms Without Soil or Water

By Parcel Post add postage at Zone rates, (see page 1).
Weight 4 oz. each, 4 lbs. per doz.

The Colchicum (Meadow Saffron) is a real curiosity in the plant world. The bulbs possess the peculiarity of producing a mass of beautiful, delicately colored, fragrant flowers in September, without any food at all. Simply place the bulbs without earth or water (or without any other food) on a mantelpiece, table or desk, and in a very short time they will produce their large, Crocus-shaped flowers. When the flowers have faded, the bulbs should be planted in the garden, where they will develop their foliage in the Spring; dig up the bulbs after the foliage has died and have them dried and cleaned. Once again you can enjoy the beautiful flowers in still greater abundance in the Autumn on your mantelpiece or desk; and the same fascinating method will repeat itself year after year.

Bulbs are procurable from September until November.

Each 10c., doz. \$1.00, 100 \$8.00.

CROCUS, SPRING-FLOWERING

"The Heralds of Spring"

Crocuses, among the first flowers to bloom in the early Spring, are always the admiration of everyone, especially when planted amid the grass in lawns, their bright flowers producing a fine contrast. They may also be planted among other Spring-flowering bulbs, such as Tulips, Hyacinths and Narcissi, making a splendid show before the other varieties begin to bloom. The results obtained from planting Crocuses in pots or pans for house blooming are very satisfactory. For this purpose it is advisable to use the best named varieties. To grow Crocuses in pots, place the bulbs about one-half inch apart and one-half inch deep, keeping them in a cool place until thoroughly rooted, when they may be brought to the light for blooming. In the open, bulbs should be set at least 3 inches deep.

Mailed free at dozen prices. By Parcel Post, weight 4 lbs. per 100.

Amaryllis

The Amaryllis, one of the most beautiful of our tender or greenhouse bulbs, is greatly admired though little grown. Bulbs should be potted in the Autumn as soon as possible, and allowed to root slowly. Their flower scape usually appears about February, after which the foliage commences to show. They should be kept growing until August or September and then allowed to rest until flowering time. Do not disturb the roots if repotting is needed. Most varieties are ready for delivery in October.

By Parcel Post add postage at Zone rates, (see page 1). Weight 3 lbs. per doz.

(Guinea Hen Flower)

By Parcel Post add postage at Zone rates, (see page 1). Weight 2 lbs. per 100.

A genus of small flowers, hardy and peculiarly spotted and checkered; and usually with a drooping effect. May be used as borders along perennial beds. They are also among the best of the small bulbs for naturalizing, especially in meadows and thinly wooded places. It is advisable to plant these as soon as possible after September 20.

Finest Mixed Varieties. Doz. 20c., 100 \$1.50.

Fritillaria Imperialis. See page 25.

Gladiolus (Cardinalis or Nanus)

The Orchid Gladioli

Ready in November

THE HARDY GLADIOLUS FOR THE GARDEN. PLANTED OUT IN FALL WILL FLOWER THE FOLLOWING JULY

A speciality of exceptional value both for forcing and outdoor culture. Extremely early flowering. Flowers outdoors in June and July

These beautiful early-flowering varieties are invaluable for pot culture and for border planting. They force readily, and they may be had in flower from the end of April till the end of July. They may be forced like Ixias, but they require more pot room, and they are invaluable for their yield of cut flowers from the open in June and July. They last long in water, and every flower opens to the extremity of the spike. Their rich colors and vivid markings on the lip petals rival those of Orchids, and we recommend this group not only for their beauty, but because they are very easy to grow. A light soil and a slight protection with litter during very sharp frost will prove all they require, and the spikes will be longer and the flowers larger if the plants are mulched in dry weather.

By Parcel Post add postage at Zone rates, (see page 1).
Weight 8 oz. per doz., 4 lbs. per 100.

- Ackermanni.** Salmon orange, with white blotches, edged scarlet.

Ismene Calathina

or *Pancratium Calathinum* (Sea Daffodil)

By Parcel Post add postage at Zone rates, (see page 1). Weight 8 oz. each, 6 lbs. per doz.

A splendid house plant for the Winter or an outdoor plant for the garden. The plant resembles an Amaryllis and produces large Lily-like blooms of a milky white. They may be flowered in pots in the house or can be had in bloom during Summer. They should be rested, the same as Amaryllis. Each 15c., doz. \$1.50, 100 \$10.00.

Ixia

The Ixia is admirably adapted for growing in the house, and as such is worthy of more general use. Twelve bulbs may be planted in a 7- to 8-in. pan, covered about 1 in., and put away to root, somewhat like Hyacinths, requiring very little water. When taken in the house, a warm place is best suited for them. Their curious markings and shadings make them attractive.

("Monarch of the East")

Blooms without soil or water

By Parcel Post add postage at Zone rates, (see page 1). Weight $\frac{3}{4}$ lb. each, 9 lb. per doz.

Delivery after November 15

Produces out of the dry bulb, without water or soil, a beautiful colored flower-spathe, 16 inches long. The only treatment required is to simply place the large, flat, round bulb on a table or shelf in a warm room or greenhouse. The flowers, which are spotted dark red on yellowish, orange-red ground, are entirely different from any other as to coloring and shape. Very large bulbs. Each 20c., doz. \$2.00.

Scilla

No charge for mailing

Sibirica. (Siberian Squill.) A very showy, bright blue variety, blooming very soon after the snow and ice have gone. It is most effective in lawns, planted in small clumps or scattered. It is also useful planted among Tulips and Hyacinths, as it blooms before those plants appear and its flowering period is over when theirs begins. Particularly valuable for rock gardens and naturalizing.

Started Bulbs in Pans and Pots

A very efficient method of growing your own bulbs in the house, without the bother of potting them, and especially where one has no cold place to store them while they are making their roots. This has been particularly satisfactory, even beyond expectations, to us as well as to our customers. We can supply these in any stage during February and March, from when they are just breaking ground to full bloom. A very satisfactory way for those unaccustomed to bulb growing; practically impossible of failure.

Physostegia speciosa

Collection of New, Rare and Beautiful Paeonies

The Paeonies are among the noblest and most magnificent of our herbaceous plants. With the addition of superb newer varieties.

The colors have the greatest range, embracing white, flesh color, rose, pink, salmon, yellow, scarlet and crimson in lighter and darker shades.

They require very rich soil, are perfectly hardy, and in planting care should be taken to select a rich, sunny place. The tip of the crown should be 6 in. below the surface.

Time of delivery. All roots can be delivered from early April until the end of May, and again from September on and until freezing time in the Fall.

Our list here only shows a few varieties. We have 300 varieties. If you do not find the variety wanted listed here, write us.

WISTARIA alba. White-flowering variety of above. Each \$1.00.

WISTARIA multijuga. (From Japan.) Longer and looser racemes and smaller, dark blue flowers. Each 75c.

Hardy Ornamental Shrubs

Shrubbery is one of the necessities of the home garden and lawn decoration, for scarcely a house is to be found without some planting of this sort. Shrubs can be selected that will bloom consecutively from early Spring until late Fall. The planting of shrubs is usually done in the Spring, but we recommend planting in the Fall as well as Spring. Ready for delivery March to May—October and November.

All our Shrubs are large, vigorous and well rooted.

ARALIA pentaphylla. (Five-leaved Aralia.) A graceful shrub, with arching, spiny branches and bright green, shining foliage. Excellent on rocky banks and slopes.
Each 50c. and 75c.

ALMOND, Double Pink. The very double rose-colored flowers are borne in great profusion, fairly covering the branches. 4 ft. high. Blooms in May. Each 50c.

Double White. Similar to preceding, except that the flowers are pure white. Each 50c.

ALTHÆA. (Rose of Sharon.) Valuable on account of their blooming in late Summer.

Double White. Nearly pure white. Extra fine.

Each 50c.

Double Red. Bright rosy red. Each 50c.

Variegata. Foliage handsomely variegated. Flowers double, deep purple. Each 75c.

AZALEA mollis. (Chinese Azalea.) A handsome dwarf species of especial beauty for massing and very hardy. Flowers bloom in early Spring and are unsurpassed for brilliancy of coloring. We offer here both red and yellow. Fine bushy plants with 20 to 30 buds.

Each \$1.00.

Pontica. (Ghent Azalea.) Unequaled for variety of color and the grandest of the early Spring flowering plants. Beautiful effects produced by massing these in beds. Large-flowering plants in orange, pink, red, white and yellow.

Each \$1.00.

Yodogama. This is one of the most valuable introductions of recent years. Brought from Japan. It has adapted itself to our soils as no other variety of Azalea. We have watched the growth of this plant for several years, and can highly recommend it for general planting. The leaves are long, narrow, and dark glossy green in color, resembling the Rhododendron, though much smaller. Habit of growth somewhat spreading. Flowers double light violet, completely covering the plant and remaining for a long season.

10 to 12 in. \$1.00, \$10.00 per doz.

12 to 18 in. \$1.50, \$15.00 per doz.

BENZOIN odoriferum. (Spice Bush.) A strong-growing shrub, with bright green foliage; flowers yellow, appearing before the leaves; has red, oblong, spicy berries, bark is aromatic. Each 50c., doz. \$5.00.

BERBERIS. (Barberry.) Excellent for hedging. Blooms in the Summer, and the flowers are succeeded by bright-colored fruit lasting till early Winter. Specimen plants of the following:

vulgaris purpurea. A choice variety with purple foliage and fine for massing.

Thunbergii. Foliage drooping and turning in Fall to orange and crimson. Berries very numerous and bright red. (See also, Hedge Plants.)

Each 50c., doz. \$5.00.

BRIDAL WREATH. See *Spiræa prunifolia*.

CALYCANTHUS floridus. (Carolina Allspice.) Fine and glossy foliage; pineapple-scented, chocolate-colored flowers all Summer; leaves dark green above and pale grayish-green beneath; a favorite shrub.

Each 50c., doz. \$5.00.

CARYOPTERIS Mastacanthus. (Blue Spiræa.) One of the best Fall-blooming, low-growing shrubs, with flowers of rich lavender blue. In New England the tops are cut back by the Winter, necessary to protect with some covering.

Each 50c.

CHIONANTHUS Virginica. (White Fringe.) One of the most ornamental of shrubs, producing racemes of fringe-like flowers. June. Each 50c., doz. \$5.00.

Deutzia gracilis—See page 47

CLETHRA alnifolia. (Sweet Pepper Bush.) Shrub with rich green foliage and spikes of fragrant yellowish-white flowers throughout the season. It thrives in shady, damp places. Each 50c.

CORNUS alba. (Siberian Dogwood.) Shrub with erect stem, good clean foliage and bright blood-red branches; useful for shrubberies. Each 50c.

Mas, or mascula. (Cornelian Cherry.) Handsome shrub of dense growth, with glossy foliage; very attractive in early Spring with its yellow flowers, and again in the Fall with shining scarlet fruit. Each 50c.

sanguinea, var. elegantissima variegata. One of the finest variegated shrubs; slow-growing, leaves broadly margined with white, contrasting strongly with the deep red bark. Each 75c.

CYDONIA Japonica. (Japan Quince.) A shrub with spreading spiny branches. Glossy leaves; flowers are a deep scarlet, in clusters. The quince-shaped, fragrant, golden-yellow fruit remains a long time in Summer. Each 50c.

DAPHNE Cneorum. A hardy evergreen plant, forming with the closely set glossy narrow leaves a most beautiful carpet effect. Blooms from May till late Summer. Flowers are bright pink, borne in clusters and very fragrant. Each 75c.

DESMODIUM penduliflorum. (Sweet Pea Shrub.) A most magnificent shrub, being covered from first of September till frost with red pea blossom in enormous quantities. 4 ft. Each 50c.

- DEUTZIA crenata.** (Single White Deutzia.) Showy, white, tinged pink flowers in close spikes. Vigorous growth. **Each 50c.**
- candissima plena.** (Double White Deutzia.) Similar to the above, but with pure white flowers throughout. **Each 50c.**
- gracilis.** Slender, often arching branches. Low, dense, globular habit; flowers pure white in racemes. **Each 50c.**
- var. aurea.** Flowers like the *D. gracilis*, with golden leaves. **Each 50c.**
- Lemoinei.** A vigorous grower and excellent for forcing; very desirable; early bloomer; panicles of pure white flowers borne on stout branches. **Each 50c.**
- Watereri.** A new form of *D. crenata*, with very double flowers, which open flat like a Rose, and are of extraordinary size. Color a fine pink. **Each 50c.**

DOGWOOD. See *Cornus*.

ELEAGNUS longipes. (Japanese Oleaster.) Growing 6 to 8 ft. high. Flowers bright yellow. Stems, leaves and fruit are covered with a golden scale. Blooms in July. **Each 50c.**

EUONYMUS alatus. (Winged Burning Bush.) A handsome shrub attaining a height of 6 to 8 ft., with corky-winged branches. Native of Japan. The leaves are oval, bright green in Summer, changing in the Fall to gorgeous crimson and red. Probably the most conspicuous of the Fall foliage shrubs. A fine shrub for massing and especially adapted for specimen work. Attracting much attention wherever planted.

3 ft., **each \$1.00, doz. \$9.00**; 4 ft., **each \$1.50.**

Europæus. (The European Burning Bush.) Large shrubs, quite hardy and valuable for their dark crimson fruits in Fall. **Each 50c.**

Americanus. (Strawberry Bush.) June. A slender-growing shrub, with shining foliage and deep scarlet berries. 3 ft. **Each 50c.**

EXOCHORDA grandiflora. (Pearl Bush.) Flowers in May. Pure white, large, star-like and in clusters. About 9 ft. high. **Each 50c.**

FORSYTHIA Fortunei. (Golden Bell.) One of our best early-flowering shrubs. Before any tree or shrub shows a leaf they burst into glorious masses of golden-yellow drooping flowers. **Each 50c.**

suspensa. (Weeping Golden Bell.) Long, graceful branches drooping to the ground and covered to the tips with handsome yellow trumpet-shaped flowers in April. 8 to 10 ft. **Each 50c.**

GOLDEN ELDER. See *Sambucus*.

HAWTHORN Oxyacantha. (Common Hawthorn.) The celebrated English hedge plant; flowers pure white, sweet scented, followed by scarlet fruit. **Each 75c.**

coccinea flore pleno. (Paul's Double Scarlet Thorn.) A tree of fine habit, with rich, luxuriant foliage; flowers much larger than the double red, of a deep crimson color, with scarlet shade and very double. **Each \$1.00.**

flore pleno. (Double White Thorn.) A very attractive variety on account of both foliage and flowers; the flowers are small, double white. **Each \$1.00.**

HONEYSUCKLE BUSH. See *Lonicera*.

HYDRANGEA arborescens grandiflora. (New.) The flower clusters are large, averaging 4 to 5 in. in diameter. Color is pure snow white, blooming at a time when flowers are scarce. 2 to 2½ ft. **Each 50c.**

paniculata grandiflora. The well-known Hardy Hydrangea. Flowers are borne in dense panicles, pure white when opening, but later of a purplish-rose color. Excellent for massing or single specimens on lawns. Extra selected. 3- to 5-year-old plants. **Each 50c.**

HYDRANGEA, Tree. A very desirable form of Hydrangea, the branches starting out 3 ft. from the ground. Excellent for center plants for Hydrangea bed. **Each \$1.00.**

HYPERICUM aureum. Dwarf shrubs. The plant, when covered with the numerous rich yellow flowers from Midsummer to Fall, presents a most beautiful aspect. **Each 50c.**

JAPAN QUINCE. See *Cydonia Japonica*.

JAPAN SNOWBALL. See *Viburnum plicatum*.

KALMIA latifolia. (Mountain Laurel.) We have some elegant plants of this beautiful shrub. Extra strong plants. **Each \$1.50, doz. \$15.00**

KERRIA Japonica. One of the most satisfactory yellow flowering shrubs we have. Blooms all Summer and in Winter its bright green branches form a marked contrast with other shrubs. Height about 4 ft. **Each 50c.**

Japonica fl. pl. Large double flowers, bright yellow in color. **Each 50c.**

Japonica variegata. Same habit as the above, with handsomely variegated leaves, making one of the best variegated plants for shrubberies and borders. **Each 50c.**

LAUREL, Mountain. See *Kalmia*.

Lilacs

We are paying particular attention to the growing of Hybrid Lilacs. The varieties we offer this season are some of the best found in the famous collection at the Arnold Arboretum, both single and double.

SINGLE HYBRID LILACS

Alba grandiflora. Very large trusses of pure white flowers. 3 to 4 ft.

Charles X. Magnificent clusters of dark red flowers, produced in the grandest profusion. 2 to 3 ft.

Frau Bertha Dammann. This produces the largest cluster of white Lilacs, of the common species known in cultivation; the flowers are of the purest white. 2 to 3 ft.

Louis Van Houtte. A well-known sort, with large clusters of fine, bright red flowers. 2 to 3 ft.

Ludwig Spæth. The clusters are very large and of splendid, dark purple-red color, not only as buds, but even when the blossoms are fully expanded. 2 to 3 ft.

Marie Le Graye. A dwarf grower, and one of the finest white varieties. 2 to 3 ft.

Rubra de Marly. Purplish red; exceedingly free flowering. 2 to 3 ft.

Villosa. (*S. villosa*.) A species from Japan. Color varies from light pink to almost blue. Valuable for late blooming. Out of bloom, the shrub forms a striking object on account of the dark, glossy, massive leaves. 3 to 4 ft.

Above varieties: **Each 50c., doz. \$5.00.**

DOUBLE NAMED LILACS

Alphonse Lavallee. Trusses like a double Hyacinth; fine, blue, shaded to violet. 3 ft. **Each 60c.**

Belle de Nancy. Large, double pink with white center. **Each 50c.**

La Tour d'Auvergne. Violet, purple, large, double; excellent. **Each 50c.**

Sweet Simon. Color bluish crimson; buds clear coral. 2 to 3 ft. **Each 60c.**

Mad. Casimir Perier. Large trusses of very double, creamy-white flowers. 2 to 3 feet. **Each 75c.**

Mad. Lemoine. A grand double white variety. Vigorous habit and immense foliage. 2 to 3 ft. **Each 75c.**

Michel Buchner. Plant dwarf, bearing at the top of all the branches. Pale lilac throughout in half-opened blossoms, and also in the bud state. **Each 75c.**

President Grevy. Petals of a cobalt-blue, with the centers more brilliant and the edges rosy. The buds are of a violet hue. 2 to 3 ft. **Each 60c.**

President Carnot. Flower delicate tint of pale lilac, marked with white in the center. 2 ft. **Each 75c.**

Senator Volland. Dwarf, very brilliant; buds fuchsia-red; open flowers rose-red. 2 ft. **Each 75c.**

COMMON VARIETIES

LILAC, Purple. One of the oldest shrubs, but still ranks among the choicest. Too well known to need description.

White. A white-flowering form of the above, and just as hardy, though perhaps not so free-flowering.

Persica. Branches slender; more drooping than other Lilacs. Flowers light purple, 5 ft. May and June.

Persica alba. A white-flowering form of the above.

Rubra de Marly. Purplish-red variety, very free flowering and often used for forcing.

Above varieties: **Each 50c., doz. \$5.00.**

Kalmia latifolia (Mountain Laurel) —See page 47

Lonicera (Bush Honeysuckle)

LONICERA Alberti, or hispida. (Siberian Honeysuckle.) Branches slender and drooping; foliage narrow and of a bluish color. Blooms in July, the flowers being on slender, erect peduncles, rosy pink and exceedingly fragrant. **Each 75c.**

fragrantissima. (Chinese Fragrant Bush Honeysuckle.) An absolutely hardy variety of strong growth, but rather straggling habit. Produces pinkish flowers in early Spring, which are very fragrant. **Each 50c.**

Morrowii. (Japanese Bush Honeysuckle.) A shrub with wide-spreading branches; leaves dark green above and grayish beneath; pure white flowers in May and June, followed by bright red fruits, ripening in August, and lasting until late in the Fall. **Each 50c.**

Tatarica. (Tartarian Honeysuckle.) Bears a profusion of pink flowers in June, which contrast well with the foliage. **Each 50c.**

Tatarica, var. alba. Similar to the Tatarica, but with large, pure white flowers and crimson fruit. **Each 50c.**

MAGNOLIA Lennei. (Lenne's Magnolia.) A fine variety; strong grower. Produces dark purple, cup-shaped flowers in April. **Each \$2.50.**

Soulangeana. (Soulange's Magnolia.) Small tree or large shrub. One of the hardiest and most popular of the foreign Magnolias. Blossoms in April; flowers white inside, outside petals pink. Foliage dense and glossy. Superb. **Each \$2.50.**

stellata, syn. Halliana. (Hall's Japan Magnolia.) Dwarf habit; spreading branches. Blooms earlier than other Magnolias, producing double, pure white fragrant flowers, the petals of which are long and narrow. Very desirable. **Each \$2.50.**

MOUNTAIN LAUREL. See *Kalmia*.

PHILADELPHUS coronarius. (Mock Orange.) Shrub with upright branches; the pure white, fragrant flowers are produced in clusters in June; foliage dark green.

coronarius, var. aureus. (Golden Syringa.) A graceful variety, with bright yellow foliage, which retains its color throughout the season; very effective in shrub-beries.

grandiflora. (Large-flowered Syringa.) A vigorous, upright variety, with large, showy flowers in June; it grows rapidly; branches are somewhat straggling.

Lemoinei. Hybrid; this is a choice and graceful variety; produces fragrant, pure white flowers in clusters in June.

Above Varieties: **Each 50c., doz. \$5.00.**

PRUNUS maritima. (Beach Plum.) A handsome plant because of the great profusion of its early Spring bloom; the fruits when produced are also ornamental; the flowers are white, followed by bright crimson fruit; one of the best shrubs for seashore planting and bleak exposures. **Each 75c.**

PYRUS arbutifolia. (Chokeberry.) A beautiful, densely-branched shrub, bearing clusters of white flowers in May, followed by extremely ornamental red berries. **Each 50c.**

RIBES aureum. (Missouri Currant.) May. Early yellow flowers in showy racemes. Glossy foliage, which gives bright Autumn tints. 3 to 4 ft. **Each 40c.**

Rhododendrons

In preparing a bed for Rhododendrons, locate it, if possible, in a spot partially sheltered from intense heat in Summer and from the cutting winds in Winter. The latter can be artificially met by using evergreen boughs as a Winter covering. The best soil for Rhododendrons consists of sods, well rotted manure, sand and a large amount of leafmold, well mixed for retaining moisture to protect from Summer droughts. Heavy mulching or covering of beds in Summer is an excellent preventive and in dry weather the beds must be thoroughly soaked. Pinch off all seed pods after flowering, in order to get good buds for next season. In the Fall, mulch the beds a foot or more with leaves, and if these can be left to decay, it is advisable to do so.

Rhododendron maximum. (Great Bay.) July. This is the noblest of all our native shrubs, and is absolutely hardy from Vermont to Georgia. It has the most beautiful foliage of any kind of Rhododendron, it being about twice as large as that of other sorts, and very thick and smooth. Forms a round, broad bush from 6 to 15 feet tall. Flowers pink and white.

Fertilizers

For Farm, Grass Land, Lawn, Garden and Greenhouse
Fertilizer Prices are F. O. B. Boston

Owing to transportation facilities due to the war and conditions existing abroad, chemicals used in the manufacture of fertilizers are quite uncertain to obtain, and Fertilizers and Chemicals offered in this catalogue are subject to being obtainable and prices subject to change without notice.

Bowker Fertilizers

BLOOD, BONE and POTASH. Ammonia 5 per cent., soluble and available phosphoric acid 10 per cent., potash 4 per cent.
100 lbs. \$2.25.

HILL AND DRILL PHOSPHATE. Ammonia 3 per cent., soluble and available phosphoric acid 9 per cent., potash 2 per cent.
50 lbs. \$1.25, 100 lbs. \$2.00.

For a small garden and general use we recommend the Hill and Drill Phosphate, for a concentrated fertilizer.

LAWN AND GARDEN DRESSING. For lawns, grass lots, kitchen gardens and flower beds. This superior dressing is made from chemicals, and is so prepared that it acts gradually throughout the season, producing a luxuriant growth of grass of a rich green color. It is far superior to lumpy, strawy manure, which disfigures the lawn and gives off an offensive odor. It is nearly odorless, and is easily applied.

Climax Lawn Sand Destroys Weeds

This remarkable preparation, when applied to weedy lawns, will adhere to the rough, hairy leaves of Dandelions, Plantains, etc., and by absorbing therefrom all the sap, destroy them beyond recovery. Moreover, Climax Lawn Sand goes to the roots of smooth-bladed finer Grasses and acts as a valuable fertilizer. The most weedy and impoverished lawn will show a remarkable improvement after a single application. A booklet giving in detail all the merits of this wonderful weed eradicator, explicit directions for use and testimonials from every part of this country, will be gladly mailed free to any applicant.

When to Apply. March, April, May, July, August, September and October are the best months, selecting a bright sunny day, with a prospect of 24 to 48 hours settled weather.

POTS AND SAUCERS, CLAY AND FIBER

Jardiniere Flower Pots, Oasls. Eight days self-watering. When potting the plant, first fill the pot with water and allow it to stand for 15 minutes, then turn out water and place plant in pot, packing the soil firmly to within 1/4 in. of top edge of pot. Place the pot in the reservoir and pour water into the reservoir through the lip around the top edge of reservoir, until water stands 1/4 in. deep in the lip. The water supply of reservoir will last for 8 to 10 days, but it will be found more satisfactory to have an appointed day in the week for refilling the reservoir, since in that case the duty is less likely for to be forgotten and neglected until the plants suffer for want of water.

Sprayers and Syringes

LOWELL SPRAYER. The best compressed air sprayer for florists' use in greenhouses. All of the tobacco extracts can be used to best advantage with this sprayer. It is both automatic and positive in its action. One charge is sufficient to expel its entire contents. Each sprayer is thoroughly tested with both air and water pressure before leaving our factory. Having convex heads, entire contents can be drained from machine, leaving it perfectly dry when not in use. Heads after being sealed and riveted are dipped into molten solder, making it absolutely air-tight and the strongest air pressure sprayer made, standing five times the air pressure necessary to operate. Tree attachment, consisting of three feet of 3/4-inch three-ply C. I. Rubber Tubing with spray nozzle one foot long, for small tree and shrub spraying; funnel with brass wire strainer cloth for filling, and shoulder strap for carrying furnished with each machine, also attachment to spray the under side of leaves. Capacity of tank, three gallons.

Complete. Galvanized steel, each \$5.00
 Brass, each 7.50

Sprayers. The Auto works automatically for 6 to 15 minutes according to the nozzle opening. Has a capacity of four gallons. Eight to twelve strokes of the plunger will compress the air, and two pumpings will discharge the entire contents. Three gallons of solution or one charge will easily cover one-half acre of potatoes or other similar crops.

Quality Chick Feed Composed largely of cracked wheat and oats. A very small proportion of corn is used, as we believe too much corn is a detriment to a young chicken's development. It contains not an ounce of anything but pure grains.

5 lbs. 20c., 10 lbs. 35c., 25 lbs. 75c., 50 lbs. \$1.40, 100 lbs. \$2.50. 5-bag lots, f. o. b., Boston, \$12.50.

Beef Scraps

We consider ground beef scraps almost indispensable for making hens lay during the Winter. Feed at least three times per week one ounce for each fowl, mixed with the daily mash.

5 lbs. 20c., 10 lbs. 35c., 25 lbs. 80c., 50 lbs. \$1.55, 100 lbs. \$2.75.

Edible Bone Meal

Made of steamed sweet bone pulverized. A fine article for growing or laying birds.

5 lbs. 20c., 10 lbs. 35c., 25 lbs. 75c., 50 lbs. \$1.30, 100 lbs. \$2.50.

Alfalfa Clover Meal

The clover stock, leaf and blossom are all ground together so that the fowl gets all the substance of the matter entering into this carefully balanced food product. It comes nearest to nature of any grain and vegetable mixture. 5 lbs. 15c., 10 lbs. 25c., 25 lbs. 60c., 50 lbs. \$1.15, 100 lbs. \$2.00.

HULLED OATS. Hulled Oats are excellent for young poultry, especially ducks and turkeys; they are far superior to wheat, corn, rye or other grains, being easily assimilated and contain more bone and muscle making properties than other grains.

5 lbs. 25c., 10 lbs. 45c., 25 lbs. 85c., 50 lbs. \$1.65, 100 lbs. \$3.25.

PARROT AND CANARY FEED. We make a specialty of Parrot and Canary feeds, which are mixed by us from direct imported seeds. Parrot seed: Qt. 10c., 3 qts. 30c., pk. 75c., ½ bus. \$1.35, Canary seed: 1 lb. 15c., 3 lbs. 40c., 10 lbs. \$1.25, 25 lbs. \$3.00.

OYSTER SHELLS. We handle the Baltimore shells cleaned. They contain no dust.

8 lbs. 10c., 25 lbs. 25c., 50 lbs. 40c., 100 lbs. 75c.

MICA SPAR GRIT. Has a sharp retained edge, thereby insuring perfect cutting and grinding qualities.

8 lbs. 10c., 100 lbs. 75c.

POULTRY CHARCOAL. Poultry keepers cannot afford to be without charcoal. It absorbs dangerous elements from the fowl's system and prevents many sicknesses. It comes in three sizes, coarse, medium and very fine.

2 lb. carton 10c., 50 lbs. \$1.00.

DRIED BLOOD MEAL. This is a highly concentrated form of animal food, rich in albumin and egg-forming material. It is odorless and contains only pure blood which makes it the cheapest animal egg food on the market today. Per 100 lbs. \$3.50.

Quality Scratch Feed

Contains various cracked grains so blended as to give the fowl the right proportion of each grain to produce the condition that will give the user the eggs. This mixture contains but a small amount of corn.

5 lbs. 15c., 10 lbs. 30c., 25 lbs. 70c., 50 lbs. \$1.20, 100 lbs. \$2.25. 5-bag lots, f. o. b., Boston.

Quality Pigeon Feed

Our peas in this mixture are grown especially for us and are small and plump. As are our other mixtures, it is blended for development and growth.

5 lbs. 20c., 10 lbs. 35c., 25 lbs. 75c., 50 lbs. \$1.40, 100 lbs. \$2.70. 5-bag lots, f. o. b., Boston.

Quality Growing Feed

Blended from the developing grains and ground into a mash. Protein, 12 to 14.50 per cent.; fat, 3.50 to 4.50 per cent.; fiber, not over 9 per cent. Ingredients: Ground corn, ground barley, cotton seed, wheat mixed feed, rye shorts. We know from experience that it will start your pullets laying from 4 to 6 weeks earlier than other so-called forcing foods.

5 lbs. 15c., 10 lbs. 30c., 25 lbs. 70c., 50 lbs. \$1.20, 100 lbs. \$2.30. 5-bag lots, f. o. b., Boston.

STONE CHICK FEEDER. One size, each 15c.

NO. 24 POULTRY FEEDER. A practical mash dry feeder. Can be used for any kind of grain, designed to hang on the wall. Will not waste the grain and will do as satisfactory work as any high priced feeder. 50c.

1-2-3 POULTRY FEEDER. For Dry Mash, Scraps, Shells, Grit, Charcoal or any poultry feed. When used for one kind of feed only take out separator; for two kinds, put separator in one end; when used for three kinds, say scraps, shells and grit, put separator in the middle and you have three separate feeders. Price 75c.

3-CYLINDER HOPPER, FOR SHELL GRIT AND CHARCOAL. Is made of heavy iron and galvanized after it is made. Will not clog, and we believe it to be the best self-feeding hopper made. Price 75c. each.

DRINKING FOUNTAINS

THE PEERLESS BROODER. It is the Ideal Fountain for small chickens. It can be hung two or three inches from the floor; the smallest chicks can drink from it, and they cannot scratch dirt into it or get wet themselves, as chickens do whenever possible. Price 30c.

THE PEERLESS 5-QT. The water is always pure. It is protected from dirt and filth. Easy to clean and fill and fowl cannot injure their combs when drinking. Simple in construction, durable and practical. It is adjustable. If it becomes too loose or too tight, spring the sides of the fountain in or out as it may require, until the bottom is a perfect fit. Price 60c.

THE PEERLESS COMBINATION. (For Winter Use.) Consists of one 5-Qt. Peerless Fountain, One Heater Complete. The Combination when in use should be set against the wall and attached to it by either back strap or bail on fountain, then it cannot be tipped over by the fowl and is absolutely safe. Peerless Combination. Price \$1.50.

EASY ACCESS FOUNTAIN. Made in two sections, thereby making it easy to clean. The hood prevents the water from becoming fouled. It can be hung against walls or from beams.

Price: 2 qts. 50c., 4 qts. 60c., 8 qts. 85c.

DOME TOP CHICKEN FOUNT. Especially adapted for young chicks. Made of heavy galvanized iron in two parts. The round top prevents their roosting on top. Price: 1 qt. 20c., 2 qts. 25c., 4 qts. 35c.

SANITARY STONE DRINKING FOUNTS. Easily kept clean; chicks cannot tip them over. 1 qt. 25c., 2 qts. 30c., 4 qts. 40c.

Clover

(Prices variable during the season. Ask for quotations in large quantities)

ALFALFA (*Medicago sativa*). Alfalfa is the mainstay of the cattle farmer, particularly of the dairyman. It is grown successfully in almost every section of the United States and Canada. Alfalfa requires a deep, fertile, well-drained soil, rich in lime and free from weeds. The lack of any one of these may be the cause of failure, especially in the Southern or Eastern States. Well-rotted barnyard manure is a suitable fertilizer. Do not use fresh manure as it produces too many weeds. The young plants of Alfalfa are very tender and if weeds are plentiful they will kill out the Alfalfa. In sowing Alfalfa special care should be taken in preparing the soil. Land should be ploughed deep, harrowed and brushed and allowed to settle for some time before sowing. In the South and East Alfalfa succeeds best if planted in late Summer, and should be sown as far in advance of what promises to be the most trying time for seedlings. Seed should be covered from three-quarters of an inch to one inch deep. Inoculation is one of the most favorable methods of securing a stand of Alfalfa, especially in the Eastern States, where the soil conditions are less favorable to the growth of bacteria. (We recommend the use of "Farmogerm" for this inoculation). Quantity of seed required for one acre, 20 to 25 lbs. **Lb. 25c., 100 lbs. \$24.00.**

CLOVER Alsike (*Trifolium hybridum*). A perennial growing from one to three feet in height. Succeeds best in rather cold soil and in marshy lands which are too wet for other varieties. As it can withstand severe cold it grows well in the North and high latitudes. Excellent for bees. Fifteen pounds to an acre. **Lb. 25c., 100 lbs. \$20.00.**

CRIMSON (*Trifolium incarnatum*). It makes a very valuable crop for pasture or green manure. For hay it should be cut when in full bloom. Flowers are bright scarlet. Largely grown in all Southern States. Will not stand severe frosts and cannot be depended upon to stand Winters north of New Jersey, although in some sections of Connecticut and Massachusetts it is grown successfully. Sow twenty pounds to the acre. **Lb. 20c., 100 lbs. \$16.25.**

RED CLOVER (*Trifolium pratense*). Medium. One of the most valuable farm crops for New England or in the West, for soiling, hay or turning under as green manure. Requires deep, rich soil and yields two crops in a season. Sow fifteen pounds to the acre. **Lb. 25c., 100 lbs. \$20.00.**

SWEET CLOVER (*Melilotus albus*). A native of all parts of the United States and Canada and is a valuable addition to farm crops in many sections. Sweet Clover will thrive on most soils, either poor clay or sandy, but it prefers a limestone soil. Where lime is deficient, it should be added, and good results will be attained. It is the most vigorous soil enricher of all the Clovers, and will grow on soils that will not support an ordinary farm crop. Quantity usually sown to the acre, 30 lbs. **Lb. 40c., 100 lbs. \$35.00.**

WHITE CLOVER (*Trifolium repens*). Sometimes called Lawn Clover and will succeed almost anywhere in the United States, and on almost any character of soil. White Clover may be sown at the same time as Red Clover; it is rarely sown alone, but usually used in lawn mixtures and for pasture. It is often affected by extreme dry weather and will appear as if killed, but on the return of the rains will reappear. 8 to 10 lbs. usually sown to the acre. **Lb. 50c., 100 lbs. \$45.00.**

GRASS SEEDS For Pasture, Mowing and Lawn

Prices of grass seeds are f. o. b. Boston; also subject to market changes.

AWNLESS BROME GRASS (*Bromus inermis*). A very satisfactory grass for arid regions as a pasture and meadow grass. It is a thoroughly permanent grass of rapid growth, produces heavy crops and luxuriant pastures. A grass that is relished by all kinds of stock, and rich in flesh forming ingredients. A particularly hardy grass, being the first to start in the Spring and the last to feel the effects of frost in the Fall. The yield is usually from one to four tons per acre and should be cut when in full bloom. When sown alone use about 35 lbs. per acre. **Lb. 25c., 100 lbs. \$20.00.**

BEACH GRASS (*Ammophila arundinacea*). Valuable on the sandy seashore, canal and railway banks, etc. Its strong, creeping, matting roots bind the drifting sand into natural embankments against the action of wind and waves. Height, 2 to 3 ft. **Lb. 50c., 100 lbs. \$40.00.**

CREEPING BENT GRASS (*Agrostis stolonifera*). Long, prostrate, creeping stems, well adapted for sandy pastures near the coast, and useful for binding shifting sands or river banks subject to wash or overflow. 15 lbs. to bushel. **Lb. 45c., 100 lbs. \$40.00.**

CRESTED DOG'S-TAIL (*Cynosurus cristatus*). A slightly tufted perennial grass, 1 to 2 ft. high, with fine leaves. Is rarely sown alone; mostly used in mixture for seed of lawns. It forms a low and compact sward when thickly sown. It is said to thrive well in the shade. **Lb. 30c., 100 lbs. \$25.00.**

ENGLISH RYE GRASS (*Lolium perenne*). Produces a strong growth in four or five weeks after sowing. It cures into a hay that is rather hard, but having a sweet flavor and much relished by cattle and horses. Height 1½ to 2 ft. Sow 60 lbs. to the acre. **Lb. 15c., 100 lbs. \$10.00.**

HARD FESCUE (*Festuca duriuscula*). A slender, densely tufted perennial grass, 1 to 2 ft. high. Thrives on dry, sandy soils. Sow 30 lbs. to the acre. **Lb. 25c., 100 lbs. \$20.00.**

ITALIAN RYE GRASS (*Lolium italicum*). It is a very rapid grower, forms a dense turf, and is regarded as an excellent hay grass. Weighs 22 lbs. to bushel. Sow 50 lbs. to an acre. **Lb. 15c., 100 lbs. \$12.00.**

Creeping Bent

GRASS SEEDS—Continued

KENTUCKY BLUE GRASS (*Poa pratensis*). A very widely distributed species, and without a rival as a pasture grass. Being of perennial habit, it will, when established, last indefinitely. One of the finest varieties of grasses for use in lawns, owing to the thick growth of sod. Blooming as it does the latter part of May, it can be harvested about June 1st and is one of the easiest grasses to cure. Seed may be sown in the early Spring or during September. An excellent variety for turfing terraces and embankments. When sown alone, 30 to 40 lbs. required for one acre. **Lb. 20c., 100 lbs. \$15.00.**

LIME GRASS (*Elymus arenarius*). Valuable on sandy seashore and railroad banks, etc. It tends with its tough, wide-spreading and thickly matting roots to prevent the drifting of the sand. **Lb. 75c., 10 lbs. \$7.00.**

MEADOW FESCUE (*Festuca elatior*). A valuable hay or pasture grass. It will thrive in wet and moist lands; a rapid grower, and tends to keep down coarser grasses which frequent such localities, forming a thick sod which will stand the trample of cattle. When sown alone 40 lbs. are required for one acre. **Lb. 25c., 100 lbs. \$20.00.**

MEADOW FOXTAIL (*Alopecurus pratensis*). It is a valuable pasture grass, on account of its early and rapid growth and of its being greatly relished by stock of all kinds. 3 or 4 lbs. to the acre. Height 2 to 3 ft. Weighs 7 lbs. to bushel. **Lb. 40c., 100 lbs. \$35.00.**

RED TOP (*Agrostis vulgaris*). A highly recommended grass for permanent pasture and as meadow grass for hay. Red Top is especially valuable for sour and acid soils, swampy and meadow lands which are liable to overflow, and those that are not rich enough for Timothy or Clover; it does not thrive on sandy or leachy soils, but will adapt itself to a wider range of soils than any other grass. To obtain the best results from Red Top it should be harvested when in full bloom. It may be sown alone of with Timothy and Clover; these additions increase the quantity and quality of the hay. Red Top makes one of the best grasses for lawn use, either sown alone or in connection with White Clover or in a mixture with other grasses.

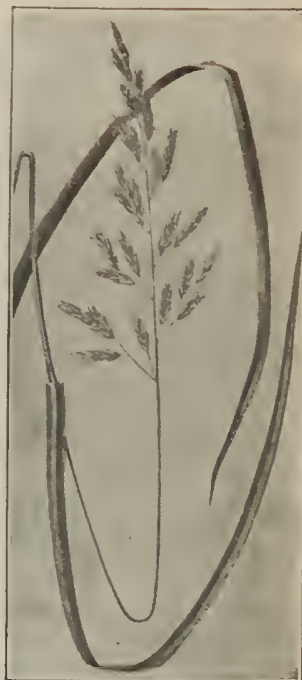

Red Top, Fancy Cleaned. Use 14 to 16 lbs. to acre. **Lb. 25c., 100 lbs. \$18.00.**

Red Top, Unhulled. Use from 40 to 50 lbs. to the acre. **Lb. 15c., 100 lbs. \$12.00.**

ORCHARD GRASS. A good grass for hay crop, yielding nearly the same amount as Timothy and almost equal in feeding value. Orchard Grass will grow on almost every soil that is not saturated with water. It prefers a moderately dry soil with considerable sandy material. It is usually sown in the Spring, but with favorable conditions may be sown in the Fall. One of the best grasses for sowing in shady places and among fruit trees in orchards. 35 to 40 lbs. required for one acre. **Lb. 25c., 100 lbs. \$23.00.**

RED FESCUE (*Festuca rubra*). Resists extreme drought; thrives on inferior soils, gravelly banks and exposed hills. 25 lbs. to acre. **Lb. 30c., 100 lbs. \$25.00.**

RHODE ISLAND BENT GRASS (*Agrostis canina*). Its hardy, creeping habit renders it desirable for close sward, also for lawns. **Lb. 40c., 100 lbs. \$35.00**

Meadow Fescue

ROUGH-STALKED MEADOW GRASS (*Poa trivialis*). Highly esteemed in mixtures for permanent pastures. It is perennial. Succeeds best in soil rather moist and cool. 20 lbs. to acre. **Lb. 40c., 100 lbs. \$35.00.**

SHEEP FESCUE (*Festuca ovina*). Is well adapted for cultivation on light, dry soils, especially those which are shallow. Sow 35 lbs. to the acre. **Lb. 30c., 100 lbs. \$25.00.**

SWEET VERNAL ANNUAL (*Anthoxanthum odoratum puelli*). Much smaller than the perennial, and of much less value, lasting one year only. 20 to 25 lbs. to acre. **Lb. 20c., 100 lbs. \$15.00.**

SWEET VERNAL, TRUE PERENNIAL (*Anthoxanthum odoratum*). Valuable for its vernal growth; throws up root foliage until late in Autumn. 2 to 5 lbs. to the acre when mixed with other sorts. **Lb. 60c., 10 lbs. \$5.50.**

TALL MEADOW FESCUE (*Festuca elatior*). Very productive; long duration; especially valuable for permanent pasture. Height 3-4 ft. 40 lbs. to acre. **Lb. 30c., 100 lbs. \$25.00.**

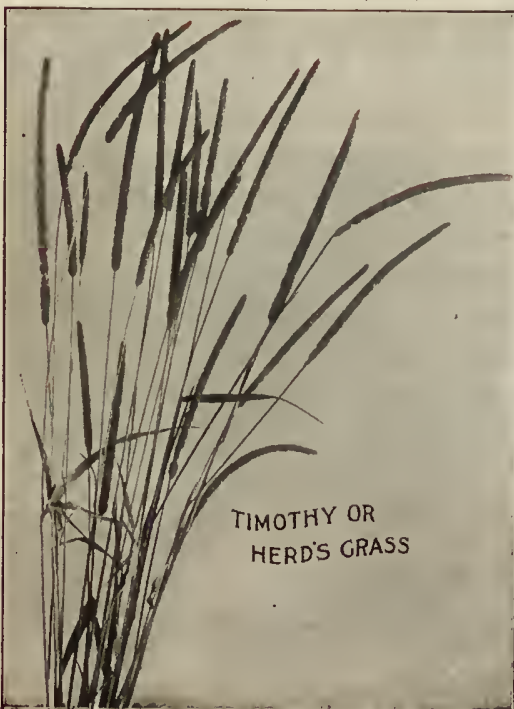

TALL MEADOW OAT GRASS (*Avena elatior*). Most valuable for pastures on account of its early and luxuriant growth. Withstands extreme drought and heat or cold. 50 lbs. to the acre. **Lb. 28c., 100 lbs. \$23.00.**

TIMOTHY, or HERD GRASS (*Phleum Pratense*). The standard hay of commerce. The excellent quality of the hay and the ease of culture make it valuable. It is adapted to most soils but succeeds best on moist loam and clay, and crops are subject to soil and climate. The most profitable crops are obtained the first and second seasons. Timothy should be cut after the seed has formed and in full milk and at least four inches above ground. Timothy sown alone requires about 20 lbs. per acre; when sown with Red Clover use 15 lbs. Timothy and 5 lbs. Red Clover. It may also be sown with Wheat, Oats or Barley. **Market price, from \$3.50 to \$5.00 per bus. Prices fluctuate.**

VARIOUS-LEAVED FESCUE (*Festuca heterophylla*). Grows naturally in open woodlands or along their borders. It makes its best growth on low-lying lands not too dry. Sow 40 lbs. to the acre. **Lb. 30c., 10 lbs. \$2.75.**

WATER MEADOW GRASS (*Poa aquatica*). For wet situations this is very useful, growing well in marshes or on margins of lakes, streams, etc. **Lb. 60c., 10 lbs. \$5.50.**

WOOD MEADOW GRASS (*Poa nemoralis*). Excellent for shaded positions in lawns and woodland parks. Very hardy, resisting extremes of heat and cold. 30 lbs. to the acre. **Lb. 30c., 10 lbs. \$2.75.**

TIMOTHY OR
HERD'S GRASS

Shady Spot Lawn Seed

For sowing on the north side of buildings, between houses, and for securing a lawn under large shade trees.

In many lawns there are places which seem as if nothing can be grown; some are shaded by large trees and others by buildings. For these locations we have offered for some time our **Shady Spot Lawn Seed**, which readily meets the desired requirement.

It is always advisable for those who are seeding down the shady places to supply new soil, if possible, especially if the large trees are producing the shade, as their roots spread so fast and exhaust the nourishment in the soil. In the event of not being able to supply new soil, the ground should be well dug over and if tree roots predominate, these should be taken out.

In most places where grass seed is to be sown, when shaded by buildings, the soil will have a tendency to sour, and in such cases we strongly recommend the use of slaked lime (about 50 lbs. per 1000 sq. ft.).

This special mixture for shady locations is selected from the best grasses possible to obtain for this purpose, and only those that will grow and flourish under shady conditions are used.

The ordinary lawn grass might grow for a short time, but as a general rule they will not last but one or two seasons and then make a poor showing.

Shady Spot Lawn Seed if sown in these places will undoubtedly grow and produce the best satisfaction.

Golf Links Mixture SPECIAL MIXTURES OF GRASSES FOR PLEASURE GROUNDS, GOLF LINKS, PUTTING GREENS, ETC.

We have given much attention to the grasses used in Putting Greens, Golf Links, etc., as there is no purpose for which turf is grown that is so exacting. No other grass is required to stand so much rough usage, and it is therefore very necessary that the proper varieties be used to produce a thick and lasting sod. Foreign grasses are largely used in our mixtures, selecting those that thrive well here, with the addition of some American varieties that are equally fine and that have proved satisfactory in our experiments as well as in practical results obtained on the various golf courses. By using these mixtures, which are prepared specially for each use and with proper care, the finest Putting Greens and Fair Greens can be had.

Mixed of Selected Grasses. Cheapest Lawn Seed to Use
 for Lawns, Terraces, Croquet Grounds, Etc.

Our **Franklin Park Lawn Seed** is made up of all the re-cleaned seeds of different varieties that will make a good lawn quickly, so that when the seed is sown, if the ground is in proper shape, it will start at once and in a short time show a beautiful, deep green lawn and retain the same during the season with slight attention.

The mixture of grass seed that we sell under this name is made by the identical formula used by the Park Commissioners of the City of Boston in their work in laying out the beautiful lawns and terraces, which add so much charm to our new parks. For many years the grass seed used on these parks has been supplied by us, which fact should be a strong guarantee of quality. The Franklin Park mixture gives a fine, velvety sward within a few weeks after sowing. Weight per bushel, 32 lbs. The very large demand for this lawn seed has necessitated our having the name "Franklin Park" registered as a trade mark, in order to protect ourselves from imitators.
